STOREHUB LOGO

PRIMARY WORDMARK

STOREHUB

OTHER VARIATIONS

ICON/LOGOMARK

OTHER VARIATIONS

The StoreHub primary wordmark should be primarily used whenever possible, other variations can be used for optimal visibility as per specific circumstances.

The "H" logomark should not stand alone in a design but only when the overall design has featured the primary logomark or has strongly portrayed StoreHub branding. However, it is allowed for use in profile pictures and app icons.

LOGO CLEAR SPACE

Apply proportional width of the StoreHub "H" logomark on all sides of the logo, to ensure ample breathing space.

LOGO USAGE

- ✓ Ensure there is enough contrast between the logo and the background for readability.

- ✗ Low contrast between the logo and the background

- ✗ Do not place the logo over busy backgrounds

- ✗ Do not change the logo colors

STOREHUB

STOREHUB

- ✗ Do not modify the logo placement

STORE
HUB

- ✗ Do not stretch the logo

STOREHUB

STOREHUB

- ✗ Do not rotate the logo

STOREHUB

STOREHUB

- ✗ Do not apply effects to the logo

STOREHUB

STOREHUB

- ✗ Do not use the wordmark and the logomark in the same layout

Feel free to use any colours from the primary palette as needed. However, for branded elements and designs, prioritize the use of the brand colours.

PRIMARY COLOUR TINTS

You can use these tints and shades into your designs as necessary. The colour tints transition gradually from 100% of the primary colour palette to 10%.

GRADIENT PALETTE

PRIMARY PALETTE BLEND

These gradients are from the primary color palette and be used to enhance depth and texture in your design. Only mix with harmonious colors as shown, avoid blending with contrasting colors.

TINTS BLEND

These gradients are from the color tints. Use them by blending from a stronger version of the color to a softer version.

Headline

We use Barlow as our **primary** typeface for headlines. **Headlines should be 100% (the largest in the hierarchy)** of the base size and at least 30% larger than sub-headlines and body text to maintain a clear hierarchy.

Sub-headline

Sub-headlines are 70-75% of the headline size. They are used to introduce sections or support headlines, standing out while remaining smaller than headlines.

Body text

Body text is 50-60% of the headline size. It is used for main content and should be clear and legible at standard reading sizes to ensure a comfortable reading experience.

TYPE HIERARCHY EXAMPLES

More Than Just a POS System

LOGO

COLOUR

TYPOGRAPHY

ICONS

IMAGERY STYLES

StoreHub's imagery style is focused in authenticity and practicality, fostering engaging and positive experiences with the brand.

StoreHub's products and features seamlessly integrate into customers' day-to-day business operations, naturally depicted in the images. This reinforces the brand's commitment to practical solutions, reliability, and trustworthiness.

IMAGERY STYLES

- ✓ Authentic and Genuine
- ✓ Subtly Featuring StoreHub's Products and Features
- ✓ Showcasing Real Lifestyles
- ✓ Balanced Composition and Optimal Lighting
- ✓ Pan-Asian Faces

- ✗ Outdated Trends
- ✗ Overly Edited or Filtered
- ✗ Exaggerated and Stock-like Facial Expressions
- ✗ Weird and Unnatural Proportioned
- ✗ Western Faces
- ✗ Stock photos with solid, colored backgrounds
- ✗ Outdated hardware

IMAGERY COLOR CORRECTION

To ensure that every photo looks clear and professional, all images must have sufficient **brightness, contrast, and saturation**. As the examples on the right demonstrate, correctly balancing these three key settings creates the positive and engaging mood for our brand.

- **Brightness:** This is the overall lightness or darkness. Photos should be well-lit, not overly dark or so bright they look washed out.
- **Contrast:** This creates sharpness and definition. Photos should look clear and dynamic, not flat, hazy, or overly harsh.
- **Saturation:** This is the intensity of the color. Colors should be rich and vibrant, not dull, faded, or grayish.

Note: While low saturation (even monochrome) can sometimes be used to intentionally create a somber or dramatic mood, it should only be applied in very specific cases — never in core brand visuals

Brightness too low

Brightness too high

Contrast too low

Contrast too high

Saturation too low

VIDEO/MOTION
GUIDE

VIDEO GUIDE

MOTION GRAPHICS GUIDE

VISUAL GUIDELINES

Video Dimensions

- Behind The Counter (BTC) videos should be in the **16:9 aspect ratio**, with the resolution of: **1920x1080**
- VP videos can vary in resolutions, namely: **1920x1080 (16:9)**
1080x1080 (1:1)
1080x1920 (9:16)
- The resolutions are for different social media platform. Acquisition team will also use the different resolutions for respective platforms. (YouTube, Tiktok, Facebook, Instagram)
- **1080p will suffice** so that files are not too heavy and can be used by everyone in the team.

BTC:
Resolution

Resolution of ads & social media cuts

Safezone (Logo Placement)

16:9 (1920*1080)

1:1 (1080*1080)

The videos in StoreHub use these colors for highlighted texts and text boxes to maintain brand identity.

Behind The Counter Treatment

"Behind The Counter" in a Three-Act Structure

Act I: The Setup

- **Hook:** (Starts the film) Grab immediate attention. Show a quick, impactful snapshot of the busy, dynamic, or emotional world of a small business. Make the viewer curious.
- **Intro:** Introduce the real lives of local business owners. Briefly show diverse StoreHub-powered businesses and hint at the passionate people running them.
- **Origins:** Delve into the "why" and "how" of their beginnings. What was the initial dream? What drove them to start? Show their passion and the first steps they took, often against the odds.

Act II: The Confrontation (The Struggle and the Lowest Point)

- **Struggles:** Detail the daily headaches and bigger obstacles. This covers everything from managing staff, dealing with unexpected costs, finding enough customers, or just the sheer exhaustion. Show how tough it really is.
- **Lowest Point:** (The turning point of the film) This is the absolute rock bottom. The moment of despair where giving up seems like the only option. This is where the emotional connection with the audience deepens, showing the true vulnerability of the entrepreneurs.

Act III: The Resolution (The Turnaround and the Future)

- **Ending:** Show the current success and transformation of the businesses. How did they pull through? What key decisions or tools (like StoreHub) helped them turn things around? Share their wisdom, their continued passion, and their hopes for the future. End on an uplifting and hopeful note, celebrating the spirit of entrepreneurship.
- Usually the **hook** is the ending, so the video is in a full circle.

Social Media Video Treatment

Problem-Solution Focused: Start by highlighting a common business pain point, then show how StoreHub directly solves it.

Merchant-Centric Stories: Feature real StoreHub users sharing their authentic experiences and successes.

Clear Product Demos: Use quick, visually clear demonstrations of StoreHub features in action.

Short & Engaging: Design videos for rapid consumption, with strong hooks and dynamic pacing for platforms like Reels/TikTok

- **Resolution:** 1080 x 1920
- **Duration:** 1-1.30minutes
(depending on the content of the video)
- **Make it snappy**

Audio Levels (Guidelines)

- **Dialogue:** Peak around -6 dB to -12 dB.
- **Background Music:** Around -20 dB to -15 dB (lower when dialogue is present).
- **Sound Effects:** Varies; subtle SFX similar to music, impactful SFX can peak higher but be brief. (-6 dB to -12 dB)
- Audio level **MUST NOT** peak above 0 dB

Audio Metering in Adobe Premiere Pro

- Audio level we must not exceed: 0 dB
- Total audio mix level: -3 dB to -6 dB
- Principle speaker (SOT) dialogue: -6 dB to -12 dB
- Sound effects audio: -12 dB to -18 dB
- Music when its an underscore: -18 dB

Talent Choice (Video)

Talent Choice: Our Interviewees

To provide the most insightful and authentic perspective, we've focused on selecting interviewees who:

- **Use StoreHub on a daily basis:**
 - They have deep, hands-on experience with the StoreHub POS system.
 - Their daily usage means they know its features inside and out.
- **Offer "Before & After" Insights:**
 - They can explain problems they had *before* using StoreHub.
 - They can highlight how StoreHub solved those problems *after* they started using it.
- **Are Guided When Needed:**
 - If an interviewee struggles to answer, we will prompt them by rephrasing the question as an answer to help them articulate their thoughts.
 - It also helps giving the team **full context** later during the editing process.
 - Let them finish their sentence, don't cut them off.

B-Rolls (BTC)

B-Roll Choice: Visual Support

When selecting B-roll footage, ensure it:

- **Complements the Story:** Visuals should directly relate to what's being discussed or shown.
- **Matches the Scene:** Avoid jarring differences in colors, lighting, or overall setting.
- **Enhances Dialogue:** B-roll should support the spoken words, not distract from them. It should make sense with what the interviewee is saying.

Examples of B-Rolls:

- Merchant cooking/working
- Staff interacting with customers
- Merchant using the POS
- The environment of the shop
- Candid shots of the merchant
- Customers using their phones to scan QR
- Customers making payments

Types of B-Rolls

Music Choice (Envato) BTC

Finding the Right Music on Envato

1. Define Your Needs

- **Mood:** What emotion? (e.g., *Uplifting, Calm, Intense*)
- **Outcome:** What action/feeling? (e.g., *Inspire, Relax, Focus*)

2. Search & Filter

- **Keywords:** Use mood + outcome (e.g., "uplifting cinematic").
- **Filters:** Use Envato's filters for:
 - **Genre**
 - **Instruments**
 - **Tempo**
 - **Duration**

3. Choose Dialogue-Friendly Songs

- **"Background" Music:** Look for tracks labeled for background.
- **Simple Sound:** Avoid complex melodies or loud sections.
- **Test It:** Always play music with your dialogue to check.

Music Choice (Envato) VPs

We use upbeat and energetic pop music to make our videos feel exciting, modern, and engaging for the audience.

- **Evokes Excitement:** Makes the audience feel happy and energized.
- **Sounds Modern:** Gives the brand a fresh, up-to-date feeling.
- **Keeps the Pace:** Moves the video along and prevents boredom.
- **Highlights Ease:** Makes the product or service seem fun and effortless.
- **Complements Fast Visuals:** Matches well with quick cuts and dynamic scenes

Music Clearance (Envato)

Clearing Music for Uploading Videos to YouTube

1. **Download Your License:** Get the license certificate for each music track from Envato Elements or AudioJungle.
2. **Use "Claim Clear":** Go to the "Claim Clear" section in your Envato account.
3. **Safelist Channel (Recommended):** Add and approve your YouTube channel(s) to automatically clear claims.
4. **Paste Video Link:** If a claim still appears, paste the specific YouTube video URL into the "Claim Clear" tool.
5. **Manual Dispute (If Needed):** If the above fails, dispute the claim directly on YouTube, selecting "License" as the reason, and paste your Envato license details.

Clear individual videos

0 / 30 monthly videos cleared.

Clear copyright claims from your Claim

Clear ready music on individual videos.

Video must be unlisted or public.

VIDEO/MOTION

VIDEO GUIDE

MOTION GRAPHICS

Basic Principles

Motion Graphics Guidelines: An Introduction

Welcome to our motion graphics guidelines! This section will help you create dynamic and impactful visuals that truly represent our brand. By keeping our animations simple, clear, and consistent, we can ensure our messages are easily understood and remembered. Our goal is to enhance visibility and clarity across all our motion graphic content, ensuring every animation aligns perfectly with our brand's identity and values.

- **Animation Style:** Use **easy easing** for smooth, natural movements. Keep animations clean and purposeful, avoiding anything distracting.

- **Pacing & Speed:** Find a balance. Animations should be engaging, but slow enough for viewers to easily understand the information.

- **Hierarchy:** Guide the viewer's eye. Animate elements in a logical order to emphasize key information and build a clear visual flow.

- **Brand Alignment:** Every motion graphic must reflect our brand's visual identity and tone. Ensure all elements — colors, fonts, movement — are consistent with our guidelines.
