

Q4 2025 Creatives Analysis (Design Standpoint)

Introduction & Context

This presentation is a part of my growth project towards a Senior Creative Designer.

The goal of this project is to evaluate the visual performance of creatives, via and through the principles of design.

Scope

(What I am doing):

Analyze and view creatives from a design standpoint, offering a design perspective on the efficiency of ads

Push those findings to be applied in designs when doing QC to hopefully fuel the creatives better

(What I am NOT doing):

Refining the stance and/or changing current acquisition process in creating and experimenting with designs

Deciding spending and ads budget for the team

Analysis Criteria

Since obviously spending affects the performance, my focus on these analysis will be on **Efficiency** rather than **Scale**. I will look at various metrics and cross-referencing them.

A high budget can force a mediocre design to get MQLs. By looking at the Cost Per MQL (CPMQL), we neutralize the budget variable to see which visual layout naturally qualifies buyers best.

1 Top-Funnel Attention

(The Appeal)

CTR, Hook, Hold & Message Rate

(Did the design stop the scroll?)

2. Bottom-Funnel Efficiency

(The Equalizer)

CPMQL, CPL, CPC

(Did the design filter for the right audience without wasting budget?)

3. Volume & Scale

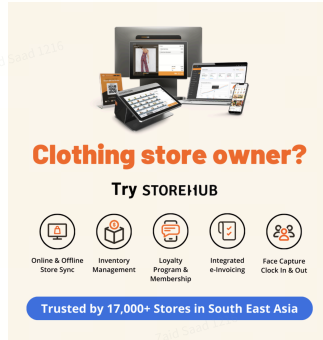

(The Impact)

Leads, MQL, Won

(How much total impact did it have?)

Winners

(MY) STATIC: PERFORMINGS

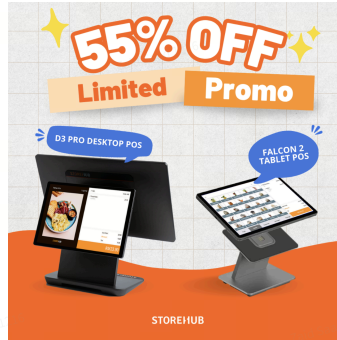

Store Owner

6 WON

CPMQL: RM146

Good CTR: 1.42%

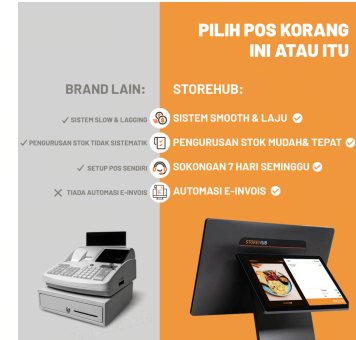

BAU Promos V2

6 WON

CPMQL: RM153

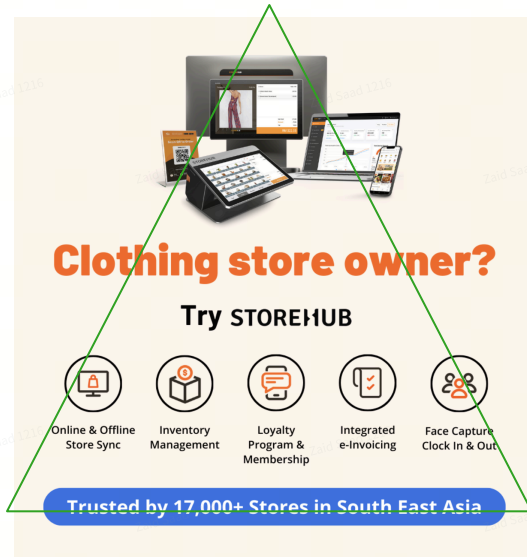

Good CTR: 1.10%

This or That V2

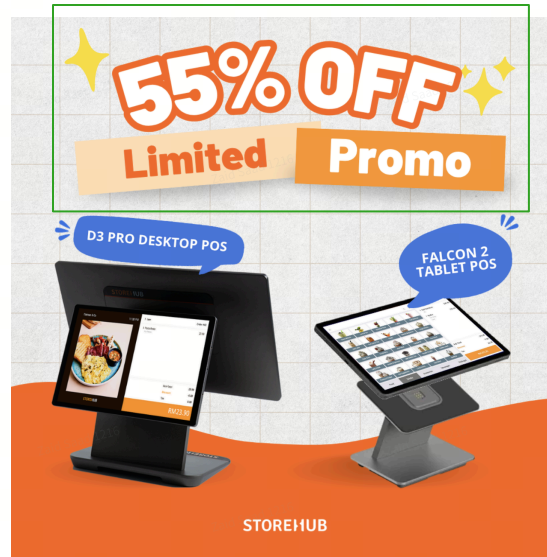

CPMQL: RM91

Low CTR of 0.25%

Store Owner

- Simple layout, straightforward: Top to bottom
- Clear digestible icons
- Clear product image
- Simplified color scheme
- Extra testimonial statement

BAU Promo V2

- Good stylistic
- Clear product image
- Simplified color scheme
- Clear and bold pricing statement

This or That V2

- Clear winner persuasion
- Clear product image
- Simplified color scheme
- Clear and visible icon

Non-Performings

(MY) STATIC: NON-PERFORMINGS

Other POS
RM4/Day

- Online and offline inventory are not synced
- No e-invoice integration function
- Inaccurate inventory management
- Not knowing the best-selling products
- Manually managing employees
- No ownership of POS hardware

STOREHUB POS
RM6.8/Day

- Ownership of POS hardware
- Composite inventory management
- Automatically send marketing texts
- Customer loyalty program
- Multi-store management
- Synchronize online & offline stores

Malaysia's #1 POS System for F&B and Retail Industry

Cost Comparison V2

Low CTR: 0.57%

High CPC: RM20

No Leads

Are you still tracking your inventory the **old** way?

Manual Tracking = Chaos

Spreadsheets Tracking = Clutter

STORE HUB = Complete Control

Get StoreHub Today!

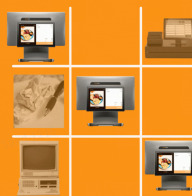

Composite Inventory

Decent CTR: 0.84%

High CPC: RM22

No Leads

Which POS Wins?

STOREHUB

Cost Comparison V2

- Too cluttered
- Hard to digest
- Unclear focal point
- Icon isn't clear

Composite Inventory

- Too complicated to understand
- Style is too realistic, hard to digest
- Unclear focal point

Winning Combo

- Animation isn't engaging enough
- Texts might be too hard to read at first glance
- The other greyed out POS isn't clear enough to be recognizable

Summary & Key Takeaways

What "Won"?

Looking at the top 3 performing ads, here are the key things that make those ads effective:

[Design-wise]: Simple & Clear Layout, Lighter Background, Clear Product Image

[Content-wise]: Solution-offering (For clothing store owners, Price discount, Benefits & features)

What "Didn't Win"?

Looking at the bottom 3 non-performing ads, here are the key things that make those ads ineffective:

[Design-wise]: Designs without a clear composition (No focal point), Overly-detailed and/or unappealing design style, Disengaging visuals, dark or too-saturated backgrounds.

[Content-wise]: Too much push for "Self Promo" (Demonstrating superiority)

Summary & Key Takeaways

Note on Scale: While I focused on the most cost-efficient designs, we also recognize the power of the high-spend, video-based promos (Tops of the lists!) It proves that when a design is clean and universally understood, it can handle massive budgets without fatiguing.

D3 Choose Your Fighter

CPMQL of RM52

CTR of 2.26%

Hook Rate of 58.2%.

D3 Mini Split Screen

CPMQL of RM76

CTR of 1.96%

Hook Rate of 46.7%

D3 Mini Unboxing

CPMQL of RM136

CTR of 2.92%

Hook Rate of 96.4%.

All of these 3 has great hooks, which is instantly clear at first glance. Texts are shown instantly. to display what the video is about, accompanied by audible sound effects.
